

Nekoma's ultimate list of BE (included) games

The following colours indicate the degree to which BE is present in the game compared to the rest of the content. (Most are from my memory, so don't put too much value in it.)

BE is the or a major focus of the game, occurs regularly, or is often a topic.

BE often occurs but isn't the main focus or has a large BE branch.

Has BE as one topic among many others or isn't specifically created for it.

BE is only a sidenote, happens in one scene, isn't permanent or extremely rare.

Flash

(I copied the following from primalemotions deviantArt page at the game description)

Playing my Flash Games on Windows:

In order to play the flash games I made you'll need to get a copy of flash player 10. bluemaxima.org/flashpoint/ has a huge number of Flash players so you can play other games. The Ultimate version is a massive file, so I recommend just getting the Infinity version of the application. Once you have the file downloaded the only thing you need is in the Flashpoint 9.0 Infinity\FPSoftware\Flash directory. You're looking for flashplayer_10_3r183_90_win_sa.exe. Once you have access to the player just activate it and find the game swf file to play.

On Mac:

You can use Elmedia player to play the game. I dont have any Mac computers to give more instruction, but someone else got it working that way."

Japanese-Only games from Dlsite

(I haven't played all of the following games personally and for some I can only speculate about how much BE they contain. But they got some in any case. Since I haven't played all of them myself, don't take this list as a recommendation. I don't want you to blame it on me if you don't like a game.)

Tutorial: Playing Japanese-Only games

First method: Visual Novel OCR <https://drive.google.com/file/d/1RXvVp3zpWa41a0jFCYHEfrlui0b0oz2v/view>

If you start the program and select DeepL as translator these windows should open.

If you put the empty box with the pink border over the area you want to translate and then click translate (or 'auto on') on the 'screen capture window' it should look like this. Now you have told the program which area to translate.

Now you have to help the program to distinguish the text from the background in the 'background removal window' with the sliders. Since the background is a single color, this is very easy. You just have to set the slider 'Invert Binarise Value' to about 180. Now only the white text colour remains. The program should start translating now.

はーど
180cm (?カップ)
31 69

バカバカバカ！どれだけ大きくするつもりよ？
ひいっ！また膨らんでく…い、嫌あああ！！

STUPID STUPID STUPID! HOW BIG ARE YOU GONNA MAKE TP? OW! IT'S GONNA GET BIGGER... OH NO!
バカバカバカ！どれだけ大きくするつもりよ？ ひいっ！また膨らんでく…い、嫌あああ！！

バカバカバカ！どれだけ大きくするつもりよ？
ひいっ！また膨らんでく…い、嫌あああ！！

Background Removal Window

Load Saved Settings: [Default] [Load] [Save]

Image Color Settings (usually, saturationMax or BrightnessMax would do)

Invert min: 255
Brightness min: 255
Color value min: 179
Saturation min: 0
Brightness max: 0
Color value max: 0

Invert Image (usually default is good enough)

Invert Binarise Value: 180

Finalized Image (black or colored text on white background)

バカバカバカ！どれだけ大きくするつもりよ？
ひいっ！また膨らんでく…い、嫌あああ！！

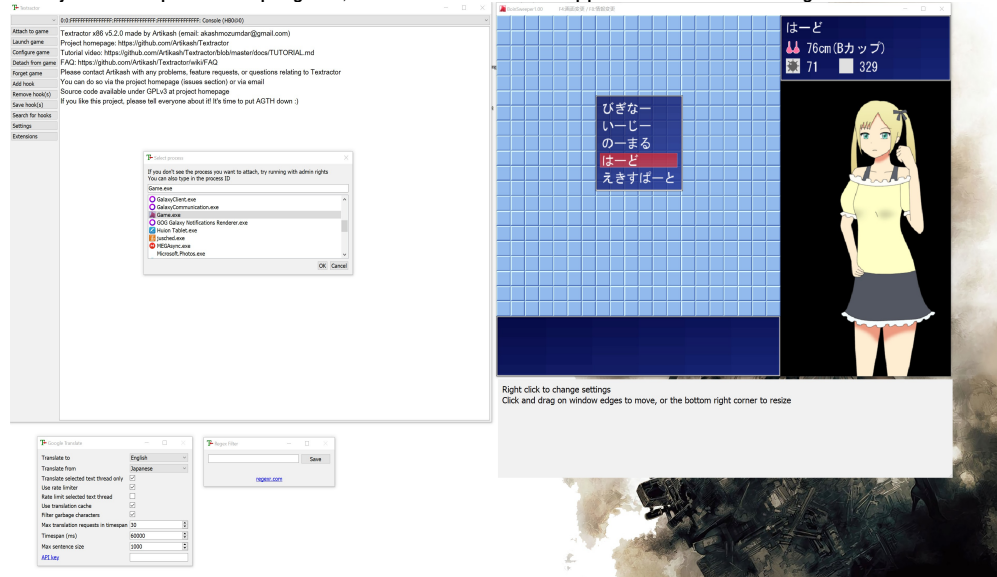

Display Images (use ColorValue MinMax as last resort. Also, sometimes 2 attributes are better than 1)

バカバカバカ！どれだけ大きくするつもりよ？
ひいっ！また膨らんでく…い、嫌あああ！！

バカバカバカ！どれだけ大きくするつもりよ？
ひいっ！また膨らんでく…い、嫌あああ！！

Second method: Artikash/Textractor <https://github.com/Artikash/Textractor/releases>
 (detailed Tutorial: <https://vnrbg.wordpress.com/2019/10/01/tutorialtextractor-a-simpler-way-to-play-japanese-vn-and-understand-it/>)

After you have opened the program, these screens should appear. Press "Attach to game" and then search for the game process.

Then look in the bar above in the middle for the hook that captures the text. (It's hard to find sometimes.)

Third method:

If an important word can't be hooked by "Textractor" or can't be recognized by "OCR" due to difficult background, I just use the "Google Translator App" for a single word or an important sentence. Mostly when a word is in a table away from the text box or something.

<https://play.google.com/store/apps/details?id=com.google.android.apps.translate&hl=de&gl=US>

It doesn't always work out and the translations are also sometimes spongy so that you have to interpret the text a little. If someone knows a better solution feel free to share. :D

Here is a guide if you have problems buying games from dlsite ->

How to buy from dlsite

So, you may be trying to buy zero no kiseki from dlsite, but you can't find a payment method that'll work. What you want to do is press on account find the point section located on the side click on 'purchase points' and then click 'DL pay'

Then you should be greeted with different point values to select 1pt = 1yen so choose the amount that's needed to buy zero

after that it'll ask you to select a payment method (it only let me choose paypal so i assume it'll be that way for you aswell)

Then you'll be asked to input your email after doing so you'll be sent an email with a link after clicking on said link you'll be at the payment screen where you can pay with paypal or card.

The payment process has been completed. enter that code now you have points, and then when checkout you want to pay with points and you'll be able to buy zero!

If the payment goes through you'll be given a 10-digit code with that code you want to go back to dl site, you want to go back to the points section, and this time click on 'input serial code'
